

WADHAM COLLEGE  
OXFORD

FROM THE  
IT DEPARTMENT

## Connecting a PC to the Wadham College Network

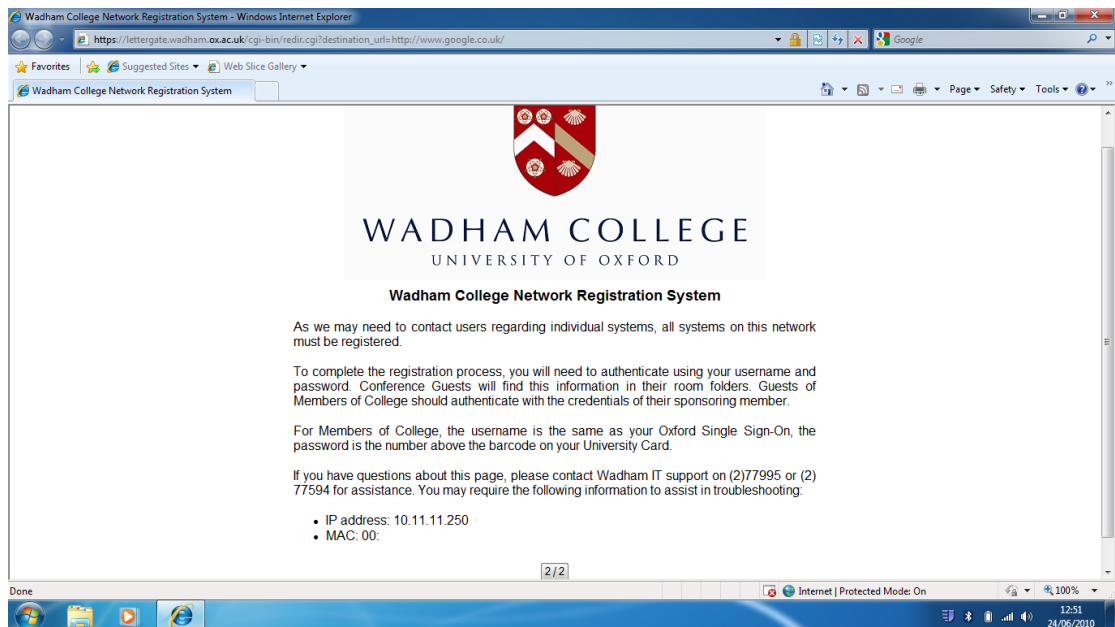

These instructions are solely for wired access. Wireless access credentials are available through the Lodge. Wireless network coverage is primarily provided for meeting rooms, it is therefore possible that it will not be available in all bedrooms.

If you encounter difficulties when attempting to connect to the network, please contact the IT department on 77594, 77988 or 77995.

To connect your PC or laptop you will need an Ethernet cable. These are slightly larger than the modem cables commonly supplied with laptops. If you don't have one, they can be purchased from the Lodge. All rooms in college have Ethernet sockets, though their location may not be immediately obvious.

1. Connect your computer with an Ethernet cable and try to view a website

You will be redirected to our registration pages, which should look like this:

2. Click the button labelled 2/2 and read the Acceptable Use Policy for the Wadham network. When done, press the Register button.
